

Calculating Average Score

Calculate level of natural vs unnatural things from your result.

$$\text{Average Score} = \frac{\text{Total Score}}{\text{Total Number of Samples}}$$

1. Calculate the Average Score of your samples in the space below:

2. What does your result tell you about the level of natural or unnatural samples in your test?

3. Is your result able to answer your original question (from the Ask stage)? Explain why/why not.
